EPSON Enhanced Matt Poster Board is the first precoated printing medium that is compatible with EPSON Colorfast pigment-based ink. It consists of a substrate already present on the poster board, with a bright white matt surface which can be directly imprinted with EPSON large-sized pigment-based printers. The Enhanced matt substrate is similar to the Enhanced Matt Paper and offers a 40% increase in colour gamut as compared to the available Double Weight Matt and Water Colour Paper Radiant White media. This printing medium is ideal for sales outlets, exposition graphics, photographs and fine art, which are areas requiring excellent colour reproduction and rigidity.
